-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hewat in view of Meeks.

Hewat teaches the use of a clamp-like device having a frame 2 including angle sections with openings for threaded plungers.

Meeks teaches the use of double sided adhesive tape to fasten a clamp to an object. To employ double sided adhesive tape to fasten the Hewat clamp frame to an object would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Meeks. One of ordinary skill in the art would have been motivated to do this in order to keep the clamp from slipping, or to otherwise make the clamp immobile relative to an object, or to more firmly "secure" the engaging surface of the clamp relative to an object. To further attach double sided tape to the engaging surfaces of the Hewat plungers is no more than an obvious extension of broad teaching of Meeks wherein double sided tape enhances the "securement" of the clamp with an object(s).

Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3723

Claim 8 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/18/05.
